On-Time Delivery. Competitive Pricing.

# HIGHSL: 100% Panel-Flat, Stress-Free Sheet & Plate

## HIGHSL: At Last, Worry-Free Laser-Quality Processing.

Carbon steel from our Red Bud Industries Stretcher Leveler arrives at your door flat, and it stays flat in your process. Our equipment stretches the material beyond its yield point to remove all the stresses introduced at the mill. Non-marking, non-slip grippers ensure that the material is clean and consistent every time.

## HIGHSL: Run to Specification Every Time, "Lights Out."

HIGHSL improves process efficiency because you can run uninterrupted by material issues. Further, your valuable equipment is protected from potential damage that may be caused by warping and movement of non-flat stock.

Call for a tour of our state-of-the-art facility to find out how  
**The Dependability Difference** can work for you!

### Stretcher Leveler Capacity

Gauge:  
 Maximum Thickness .....0.50" (12.7 mm)  
 Minimum Thickness .....0.060" (1.52 mm)

Sheet Size:  
 Maximum Width .....72.0" (1829 mm)
